

Fluorine-free Nano Coatings

PF-211 Water and oil-repellent coating

DESCRIPTION PF-211 is an aqueous emulsion Fluorine-free Nano Coating can be applied on textile materials.

TYPE Textile self-cleaning nano coating

- KEY FEATURES**
- No affect the feel of the fabric
 - Free of PFOA and PFOS
 - Fabric color and handle are not affected
 - Excellent washing resistance
 - Outstanding and durable oil, soil and water repellency
 - Resistant to washing and dry cleaning when combined with crosslinker
 - Suitable for all fiber types, laminates, leather and textile surfaces

TYPICAL PROPERTIES	Appearance	Milky light yellow liquid
	Solid content (%)	20-23
	pH (50% in water)	3.0-5.5
	Ionic	cationic

- APPLICATION**
- Fabric, Textile, Cotton, Wool, Polyester fabric, Suede/leather corduroy etc.
- Application**
- The recommended dosage is 20-100g/L, which is dried and shaped by one dipping and one rolling. The specific process, please adjust the sample as appropriate
 - Precautions when using
 - Wash the fabric thoroughly to minimize residual hydrophilic or ionic substances.
 - When diluting the product, please use water below 40 °C. Please keep the temperature of the working fluid below 40 °C during processing.
 - When using other additives such as antistatic agents,

Eco-Friendly

NANO COATINGS

Non-Toxic

The Chemical Company

softeners, and penetrants, please fully confirm the compatibility and water resistance beforehand. When adjusting the liquid, please dilute the processing aids at least 2-3 times and then mix.

- Sealed and protected from light, with a shelf life of 5-40 °C for 12 months, avoid direct contact with sunlight.
- The application method

STORAGE

- Available in 5L/barrel or 25L/barrel
- Store products in tightly closed original containers at 5-40°C
- Shelf life: 12-15 months from delivery date
- According to non-dangerous goods transport
